

Concept II

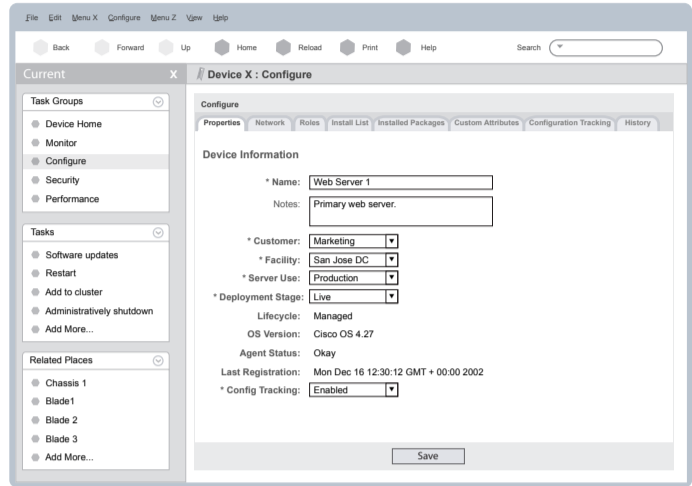

1. Application Home Page - menu bar, global toolbar with integrated search, left navigation panel with context related customizable containers for tasks, places, and users. Content area contains portlets for To Do's, My Devices, and can be customized with other available content.

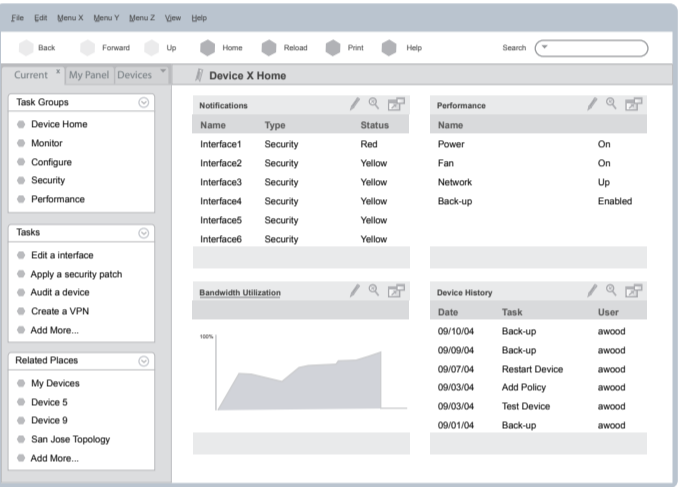

7. Application Home Page - this screen demonstrates a task panel and task customization dialog.

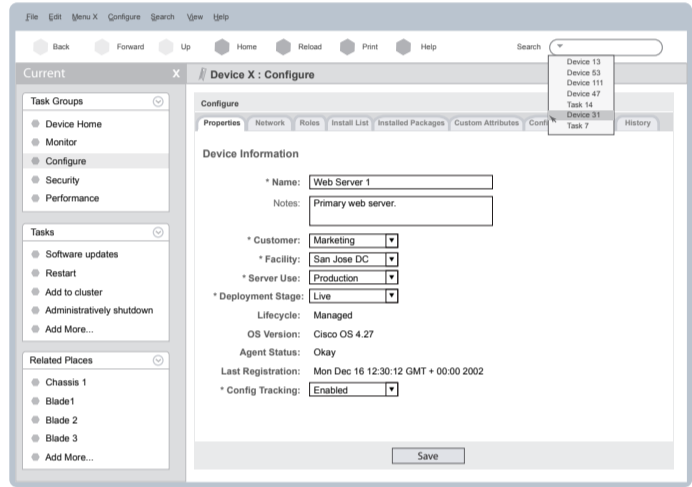

2. Device Home Page - left navigation panel with context specific customizable containers. The content area is designed to house high-level information regarding the health, security, performance, and history of a device. These informational portlets can be drilled into or spawned into new windows.

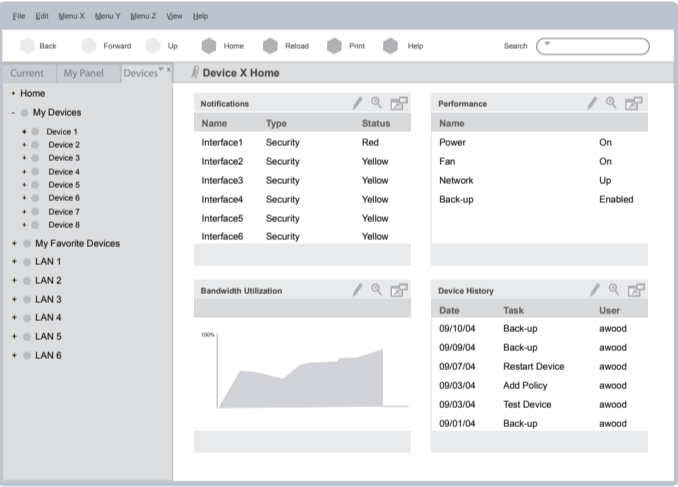

8. Device Configuration Screen - this screen demonstrates Device X configuration functionality. Notice Configuration is selected in the left navigation area. The Activities box on the left provides basic navigation necessary to access high level Device X command and control activities. When a new activity is selected, a menu for that activity will appear in the menu bar. The menu will have all features necessary for that activity.

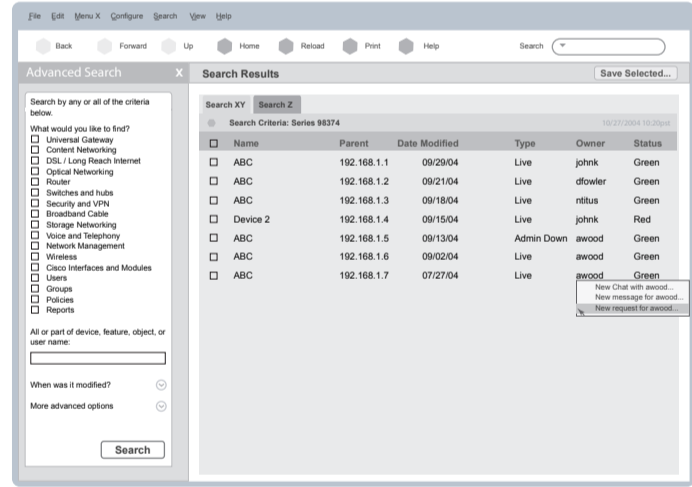

3. Device Home Page - this screen demonstrates how tabs in the left navigation panel can scale. Once the tab area is used up, a dropdown menu appears to provide access to all other open tab panels.

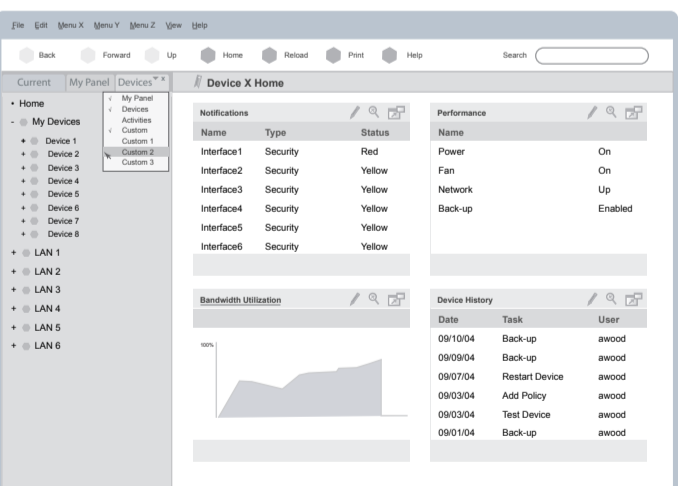

9. Device Configuration Screen - this screen demonstrates access recent search results from a search field pull-down menu.

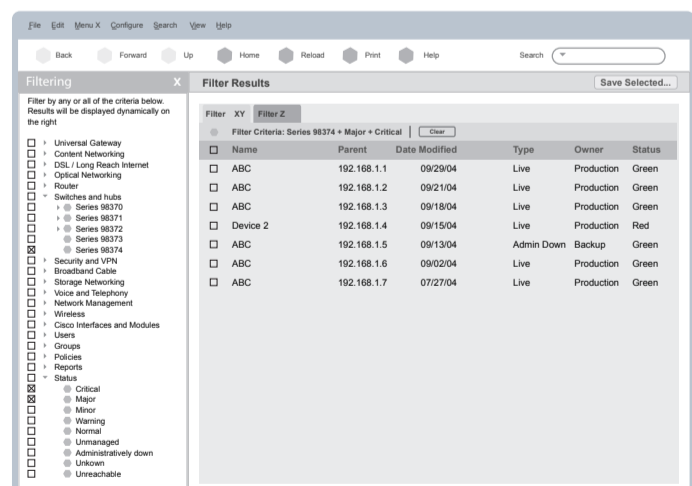

4. Device Home Page - this screen demonstrates a device tree in the left navigation area. All panels are available from the View menu.

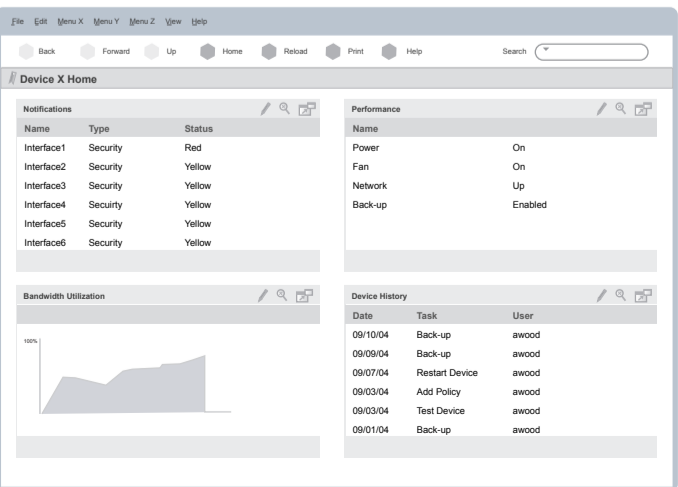

10. Advanced Search - this screen demonstrates a flexible approach to advanced search. The screen also demonstrates a contextual menu used to make requests from device administrators. Advanced Search is accessed via the View menu.

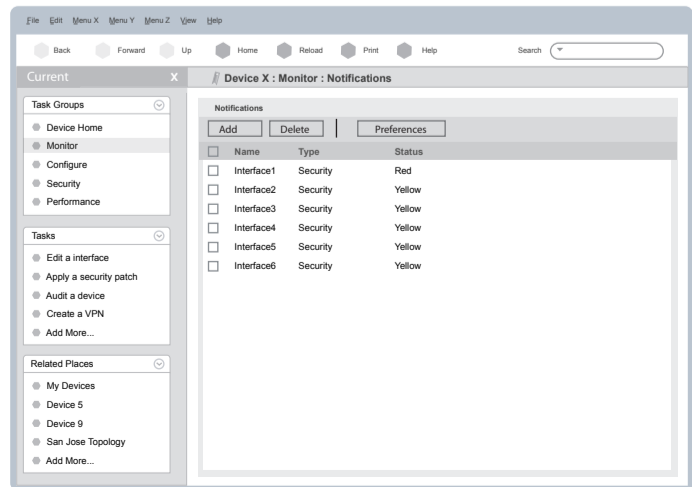

5. Device Home Page - This screen demonstrates a scaling solution for managing left navigation tabs.

11. Advanced Filtering - this will be the means to create dynamic persistent group. Filtering functionality is accessed via the View menu.

6. Device Home Page with left navigation closed

12. Device X Notifications - xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
