Port Settings

**Quicktip:** Use the Port Settings Configuration Panel to enhance performance on your network. Full duplex mode yields the highest network throughput. For more info, review [Port Settings Help](#).

Reset to Factory Defaults

**Warning:** checking the "Reset to Factory Defaults" and submitting this page will reset the switch to the Factory Defaults and restart the switch. All Configuration information including the IP address will be removed and the connectivity to the switch will be lost.

Select the checkbox and click on Apply to restart the switch.
